optibelt TRUCK POWER SUR

THE NEW TENSION AND GUIDE IDLER PULLEY RANGE FROM OPTIBELT

The **optibelt TRUCK POWER SUR** range was developed to meet the exacting quality and durability requirements of products in commercial vehicle engines. So, in addition to comprehensive repair sets, Optibelt also offers individual tension and guide idler pulleys for trucks and buses.

PRODUCT RANGE

A wide range for all common trucks and buses. Please feel free to request our product range and reference list.

PACKAGING

Protective individual packaging in matching sizes.

NOTE

Due to increasingly high requirements where durability, noise reduction and safety are concerned, it is recommended that all of the components in a belt drive are changed at the same time.

GOOD TO KNOW!

Evolving from more than 150 years of **company history and activity as an OE supplier**, our high standards of quality are constantly developing. The same standards apply to the **optibelt TRUCK POWER SUR** range as to the manufacture of our belts.
